Summary

A Data Science and Artificial Intelligence student with a passion for and extensive experience in Data Analysis using Python, SQL, Excel, and Power BI. Built multiple end-to-end analytical projects.

Skills

- Python (Pandas, Numpy)
- SQL (SQL Server)
- Excel (Power Query, Power Pivot, Pivot Tables)
- Power BI (DAX, Power Query, Data Modeling)
- Workflow Automation (n8n)

Project

World Wide Importers Sales Analysis - Personal Project

- Conducted end-to-end sales data analysis using Python (Pandas).
- Joined fact and dimension tables to uncover business insights and performance trends.
- Detected data quality issues and generated actionable recommendations based on sales analysis.

Global Tech Layoffs End-to-End T-SQL Pipeline & Analytics (MS SQL Server) - Personal Project

- Built a 7-stage T-SQL pipeline to clean and analyze 2.3K+ global tech layoff records.
- Applied CTEs, Window Functions, and SQL Views to create reporting-ready analytical datasets.

Sales Analysis Dashboard - Personal Project

- Cleaned and analyzed sales data to build an interactive Excel dashboard using Pivot Tables, Power Query, and Power Pivot.
- Developed visualizations to monitor key performance metrics and identify sales trends.

Excel Data Jobs Dashboard - Personal Project

- Built an interactive Excel dashboard using formulas, XLOOKUP, and charts to analyze salary distributions, job market trends, and in-demand skills across data-related careers.

Education

Bachelor's of Data Science & Artificial Intelligence

Yarmouk University

Expected Graduation: 2028
