PROFESSIONAL SUMMARY

Data Science & AI student with a strong foundation in Python, data analysis, and machine learning. Currently focused on building skills in AI Engineering and LLM-based applications, with hands-on experience using Python, Pandas, NumPy, scikit-learn, SQL, and Excel, as well as working with LLM APIs, context, and LLM instructions..

SKILLS

- **Python** (scikit-learn, Pandas, NumPy)
- **Machine Learning**
- **LLM APIs**
- **SQL** (SQL Server / T-SQL)
- **Data Analysis & BI**
- **Excel** (Power Query, Power Pivot, Pivot Tables)

KEY PROJECTS

Sleep Health Risk Prediction — Machine Learning Project

- Built a multiclass classification pipeline to predict sleep disorder risk across four classes using scikit-learn.
- Applied preprocessing with ColumnTransformer, imputation, StandardScaler, and OneHotEncoder, then compared three classification models using 5-fold stratified cross-validation.
- Tuned the best-performing model with GridSearchCV using macro F1 and evaluated it on a held-out test set.

Customer Shopping Behavior Analytics — Personal Project

- Cleaned and validated 3,900 customer records with Python and Pandas, achieving a reliable, analysis-ready dataset free of quality issues.
- Answered 10 business questions via advanced SQL (CTEs, aggregations, window functions), uncovering actionable revenue and behavior patterns.
- Delivered an interactive Power BI dashboard that visualized customer trends and business insights, enabling faster data-driven decisions.

World Wide Importers Sales Analysis — Personal Project

- Engineered an end-to-end analysis pipeline using Python (Pandas), joining fact and dimension tables to uncover cross-segment performance trends.
- Identified data quality issues and delivered actionable recommendations that improved analytical accuracy and business decision-making.

EDUCATION

Bachelor's Degree — Data Science & Artificial Intelligence **GPA: 90.3**

Yarmouk University | Third-Year Student | Expected Graduation: 2028

CERTIFICATIONS

- AWS Academy Graduate — Machine Learning Foundations
- Machine Learning with Python — IBM
- Introduction to Data Analytics — IBM
- Power BI Training — 24 Hours — Yarmouk University

ACHIEVEMENTS

4th Place — Nova Brainlytics Data Analysis Hackathon, Yarmouk University

Applied Python for data analysis and built a Power BI dashboard as part of a team under time constraints.

LANGUAGES

Arabic (Native) **English** (B1 — Intermediate)
