## Professional Summary

Data Science & Artificial Intelligence student with hands-on experience in data analysis, data cleaning, and data visualization using Python, Pandas, and Microsoft Excel. Built multiple end-to-end analytical projects and achieved 4th place in a university data analysis hackathon. Seeking a Data Analyst Internship to apply analytical skills in real-world business environments.

## Education

Yarmouk University

Bachelor's Degree in Data Science & Artificial Intelligence

Second-Year Student

Expected Graduation: 2028

## Projects

### WorldWide Importers Analysis

- Conducted Exploratory Data Analysis (EDA) on real-world business data to identify seasonal sales trends and customer purchasing patterns.
- Cleaned and preprocessed messy transactional datasets using **Pandas**, handling missing values and data type inconsistencies to ensure analysis accuracy.
- Engineered custom metrics and KPIs to evaluate store performance, delivering data-driven insights to support business decisions.

### Global Tech Layoffs Data Pipeline & Profiling (MS SQL Server)

- Built a 3-stage SQL Server pipeline using TRY\_CAST and TRY\_CONVERT to safely ingest and fix data types for compromised global records.
- Authored data profiling scripts utilizing SUM(CASE WHEN...) and UNION ALL to track exact null metrics and data distributions.
- Programmed clean-up queries using CTEs with ROW\_NUMBER() to purge duplicates, alongside standard Self-Joins to fix missing entity data.

## Sales Analysis Dashboard

- Developed an end-to-end data analysis workflow, transforming raw sales datasets into clear performance tracking metrics.
- Utilized **Python and Pandas** to aggregate multi-dimensional sales data, optimizing data preparation for visualization.
- Designed comprehensive data visualizations that highlight key business trends and underperforming sectors.

## Excel Data Jobs Dashboard

- Built an interactive **Excel** dashboard utilizing advanced formulas and Pivot Tables to analyze global data job market trends.
- Cleaned and structured unstructured job listings data, enabling seamless dynamic filtering and reporting.
- Visualized key market insights, such as salary distributions and top-demanded skills, into an executive-ready report.

## Technical Skills

Python, SQL, Microsoft Excel, Pandas, NumPy, Data Analysis, Data Cleaning, Data Modeling, Data Visualization, Power Query, Power Pivot

## Achievements

Nova Brainlytics Data Analysis Hackathon – Yarmouk University  
Achieved 4th place in a competitive data analysis challenge.
